SUMMARY

Senior Data Scientist with nearly 6 years of experience bridging the gap between Data Engineering and Applied AI. Expert in building end-to-end ML pipelines, from ETL automation to deploying ML applications. Proven track record of driving revenue growth through Bayesian modeling and predictive analytics.

SKILLS

- AI & Machine Learning: Supervised/Unsupervised learning, LightGBM, PyTorch, Bayesian Inference (Stan), NLP, Computer Vision
- Generative AI: LangChain, Vector Databases (Chroma, Qdrant), LLM Fine-tuning, Prompt Engineering
- Data Engineering: ETL, SQL, NoSQL, Feature Store Development, Workflow Automation, RAG
- Tools & MLOps: MLflow, Docker, Git, Linux, Cron jobs.
- Languages: Python, R, SQL

PROFESSIONAL EXPERIENCE

Afiniti

Sr. Data Scientist

Remote

Jan 2025 – Present

- Revenue Optimization: Architected and deployed ensemble predictive models (LightGBM, Stan) for leading UK telecom clients.
- Technical Leadership & Enablement: Facilitated cross-level Knowledge Transfer for junior and senior scientists, streamlining modeling workflows and mentoring 3+ peers in migrating R to Python and in Python environments.
- Operational Excellence: Developed comprehensive monitoring and debugging alerts for production environments, utilizing deep-dive data analysis to proactively identify anomalies.

Data Scientist II

Jan 2023 – Jan 2025

- Efficiency Gains: Optimized R-based statistical pipelines using parallel processing, reducing model training time from 14 hours to 3 hours.
- Robust Validation: Developed a custom diagnostic framework for Bayesian models, decreasing post-deployment "model drift" incidents by 25%.
- Productionalization: Successfully migrated legacy scripts into containerized Docker environments, ensuring seamless deployment in the production environment.

Data Engineer I & II

Oct 2020 – Jan 2023

- Infrastructure Lead: Designed and maintained high-throughput ETL pipelines using Talend, processing 1M+ rows daily with 99.9% uptime.
- Project CRUX: Spearheaded the development of "CRUX," an internal feature engineering library that standardized features across different ML models, reducing data prep time for DS teams by 50%.
- Automation: Automated performance and invoicing logic via Python and SQL, eliminating manual errors and reducing the reconciliation time and manual effort.

EDUCATION & OTHER

B.S in Computer Science

National University of Computer & Emerging Sciences (NUCES)

CERTIFICATIONS:

- Deep Learning Specialization
- Bayesian Statistics: From Concept to Data Analysis (with Honors)
- Career Essentials in Generative AI by Microsoft and LinkedIn
